

Case Study

Treatment of a Diabetic Foot Ulcer with CDO Therapy

Ronald Levine, MD

Internal Medicine, Board Certified, Cos Cob, Connecticut

Patient:	65 year old Caucasian male with non-healing diabetic wound on his foot
Age of Wound:	Greater than 4 years
Previous Treatment:	5 months of NPWT
Treatment:	OxyGeni® set at 3 ml/hr
Days on Service:	81 days
Cost of Treatment:	NPWT \$21,683 - CDO \$8,640 = \$13,043 Total savings.
Outcome:	Goals met. Wound healed. High patient satisfaction.
Physician Testimony:	“In my practice I see a lot of complicated patients with a multitude of co-morbidities. I was very pleased with the results and overall experience.” - Ronald M Levine, MD
Caregiver Testimony:	“This process proved to be very simple and easy. The wound healed almost miraculously! We are extremely grateful for this experience.” - KW, spouse of patient JW

Day 0 - Initiation of CDO

1.7 x 1.2 x .5 cm

Day 81- Wound Healed
